## Target Audience - Space is limited to 50 participants

This course is intended for the registered nurse (RN) and licensed practical/vocational nurse (LPN/LVN) with less than one year of TB experience and greater than 25% of job duties dedicated to TB case management including case identification, and treatment of patients with tuberculosis infection or disease. **Participants must complete the CDC Self-Study Modules 1-5 and 6-9 and email the lead trainer a copy of their Certificate of Completion by April 23, 2021.**

## Continuing Education

The Centers for Disease Control and Prevention is accredited as a provider of Continuing Nursing Education by the American Nurses Credentialing Center's Commission on Accreditation.

This activity provides **9.0 CNE** contact hours

NO commercial support was given to Heartland National TB Center or the University of Texas Health Science Center at Tyler for this educational program.

# Online Course

## Program Description

The goal of this course is to provide an introductory training experience covering the basic elements, knowledge and skills essential for the nurse case manager responsible for the care of patients with active TB disease and their contacts. This course also provides new nurses with the foundation necessary to attend Heartland's TB Nurse Case Management course.

## Conference Objectives

Upon course completion, participants will be able to assess and manage TB patients by: defining case management as it pertains to TB, identifying components of a patient assessment, development and implementation of a treatment care plan identifying potential or existing health problems, identifying social information needed for case management, describing the monitoring process for adverse drug events and patient infectiousness using proper nursing interventions, describing the components of an effective TB control program including personal respiratory protection, discussing the impact of the guidelines on contact investigation evaluation and treatment of contacts, describing how to assess continuity of care during and after hospitalization, analyzing documented data to evaluate for patient success, and describing the process for completion of treatment.

## Format

The format for this course will be web-based and will include live lecture presentations online, Adobe Captivate online modules, online topic discussion and homework assignments (to be completed in-between the live webinars). There will be ample time for questions and answers during the group discussions.

## Hardware/Software/Materials

To access and view this course, you will need a computer with internet access. Audio for this web based training will be through your computer's speakers. It is recommended that you check your system for compatibility and connectivity prior to the course. Instructions to test your system will be sent with confirmation of participation. For technical assistance contact Edgar Salinas at 210-531-4520 or [Edgar.Salinas@uthct.edu](mailto:Edgar.Salinas@uthct.edu)
